the acronyms RSA and DSA should be spelled out.

Appropriate correction is required.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 107-112, and 184-187,189-191, drawn to an IC module apparatus for dispensing postage for a mailpiece.
 - II. Claims 8-14,16-25 and 113-118,120-129, drawn to apparatus for generating a content of a mailpiece.
 - III. Claims 82-85,87-92,96,100-106, drawn to a method for dispensing postage and content for a mailpiece.

VII. Claims 201, 97-99, drawn to a system for dispensing postage on a mailpiece with a transmitter for transmitting facsimile.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

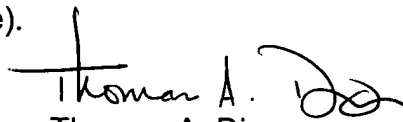

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
